EXPERIENCE

Troop

Remote

Software Engineer

07/2022 - 11/2022

- Engineered real-time financial dashboards to include statistics for \$3M in assets and variable content feeds dependent on user holdings among 600+ company entities, enabling engagement with community-driven proposals, encouraging shareholder activism.
- Structured and maintained staff content management platform with React-Admin, facilitating content creation and internal asset management for a team of 9 editors. Allowing CRUD operations for articles and company entities.
- Facilitated feature development within NextJS and React-Native android applications maintaining feature parity, and timeline for product deliverable expectations in an Agile methodology.

Choice Hotels International

Phoenix, AZ

Software Engineer I

10/2021 - 07/2022

- Engineered frictionless user interfaces and custom components utilizing React and Redux to improve hotel reservation booking and management experience for 7,000 international hotels from server-side rendered application.
- Led ADA compliance optimization for user interfaces, integrating Google Lighthouse for performance and accessibility metrics in accordance with WCAG 2.2 standards.
- Developed efficient data manipulation and storage pipelines to optimize performance of reservation and guest management systems for 4000+ daily users using Typescript.

AdviNow Medical

Scottsdale, AZ

Software Engineer I

07/2021 - 10/2021

- Led front end development team in platform and browser consistency verticals, leveraging a mobile-first methodology to build a responsive enterprise application that facilitated contactless onboarding for 16 clinics.
- Architected HIPAA compliant document collection and financial services pipelines, appointment booking, and SMS notifications to connect with doctor admin portal and act as a medical scribe for clinics.

BizIQ

Phoenix, AZ

SEO Analyst

10/2019 - 07/2021

- Formulated content delivery and optimization schedule to prioritize business development strategies for 2,800 local and 35 national businesses.
- Completed technical audits and site structure optimization, leveraging Screaming Frog Crawler, Google Analytics, and XML Sitemaps for 2,000+ websites.
